

LIBRI

Literary Bibliography Research Infrastructure

LiBRI is a project of Czech Literary Bibliography (Institute of Czech Literature, Czech Academy of Sciences) and Polish Literary Bibliography (Institute for Literary Research, Polish Academy of Sciences), realised since 2020. Its goal is to integrate the data of both bibliographies in VuFind discovery system interface for joint presentation and searching.

Contemporary Literary Bibliography: **1,040,000+** records
Literary Bibliography of the Contents of Polish Periodicals of the 19th and 20th centuries: **400,000+** records
Polish Literary Bibliography (1944-1988): **140,000+** records

The interconnection entails:

- Structure and formats mapping of all integrated sources
- Data conversion into common format MARC21
- Mapping and unifying of subject headings and other descriptive thesauri
- Language unification
- Joint authority file creation

everything is mixed together in VuFind :-)

vufind

Retrospective Bibliography of Czech Literature: **1,600,000+** records
Contemporary Bibliography of Czech Literature: **635,000+** records
Bibliography of Czech Literary Internet: **35,000+** records
Bibliography of Czech Literary Samizdat: **15,000+** records
Bibliography of Czech Literary Exile: **10,000** records

At the moment, the main collections of both CLB and PBL with total **4,000,000+** records were unified under MARC21 format and imported to the joint interface at
